

Mrs. Cruz

7th Grade Math

I began my professional career after graduating from University of Central Florida with an Elementary Education bachelor's degree with a minor in psychology in Spring of 2011. My first-year teaching was the 2011-2012 school year, in a 6th grade classroom and this is where my love of teaching mathematics began. Being able to see student's growth within a school year is the best part of my job. I can show my enthusiasm for the subject and this tends to be instilled within the students.

Each day is a new adventure in my classroom and the students are my explorers. Together with a team of amazing and creative teachers, I am committed to providing your family with a loving and developmentally sound foundation for a lifetime of learning. I know that children all have different individual learning styles, and I strive to create and maintain an environment where your child can grow and thrive while exploring the world around them.
